Glamorous Clams Preparation sheet

Just a small amount of preparation before we get together, we will have you stitching more in class. Not compulsory but recommended. Thank you

- Please draw this 5-inch clam shell pattern on the smooth side of your Vlisofix or paper backed fusible 20 times. **Please measure the clam after photocopying that it is as close to 5 inches in height and width**
- Cut around the outside of the shape ¼ inch approximately AWAY from your drawn line.
- *Please do not cut on your drawn line*
- Iron these 20 shapes webbing side down on to the **wrong** side of your chosen fabrics.
- Cut out the clam shell on the line now with scissors.
- Place clams in snap lock bag and bring to class with remainder of Vlisofix and fabrics.
