## A little Garden Before Class Preparation Christchurch 2017

- A small amount of preparation before class helps you get on to the machine, the fun stuff faster.
- On your fusible web please draw on the smooth side with a pencil the following:
- L1 x9, L3 x4, L2 x 4 , 14 times the 2 inch and 3 inch clam shells.
- (Check the size that 3-inch clam is 3 inch high and wide after scanning this can reduce in size. )
- Roughly cut ¼ inch away from the line
- Press with a dry iron each shape onto the **wrong** side of your chosen fabrics.
- Cut out each shape now on your drawn line and place in a snap lock bag and bring to class.
- Please bring remainder of fabrics and fusible webbing to class.
- Thank you see you soon.
